

MUNICIPAL, SITE, OR STRUCTURAL ENGINEER

Do you like working on challenging, innovative projects? Are you interested in working with an experienced, supportive team? Look no further.

Since 1982. *Together we provide solutions.* At IIW, our mission is about providing solutions. We work together with our clients to provide solutions that bring them value. We do that with a team of highly qualified employee-owners that have embraced a culture of collaboration.

IIW provides an environment that enhances our employees' professional development, work satisfaction, and the ability to give back to our communities in a real, tangible way. Being recognized as a "Best Firm to Work For" by the Zweig Group, we are committed to living up to that standard. We know our high employee satisfaction has a direct impact on our client satisfaction.

We are currently looking for a **Municipal, Site, or Structural Engineer** to enhance our staff and better serve our clients. The position will be based out of our **Davenport office**.

Our ideal candidate is a self-motivated individual who excels at project management and is looking to expand into leading a design team. The right person will have exceptional technical skills in the areas of land development, structural design, or municipal engineering. This person will also excel at business development in the Quad Cities area.

POSITION REQUIREMENTS

- > Minimum 6 years of practical experience in design of public and/or private projects.
- > Bachelor's Degree in Civil Engineering.
- > Current Licensure as a Professional Engineer in Iowa with the capability of obtaining multi-state licensure.
- > Practical knowledge of codes, ordinances and regulatory requirements related to project design.
- > Experience in contract negotiation, project management, financial management, and business development.
- > Working knowledge of Autodesk Civil 3D and/or Revit platform.
- > Effective communication with staff, clients, contractors, and regulatory agencies.
- > Proven success with selling, managing and executing projects
